

31st Baltic Valuation Conference

Virtual Conference

on June 17th, 2021

INVITATION

BVS – Bundesverband öffentlich bestellter und vereidigter sowie qualifizierter Sachverständiger e.V.

Hochschule Wismar – Fakultät für Ingenieurwissenschaften – Bereich Bauingenieurwesen

DVW – Gesellschaft für Geodäsie, Geoinformation und Landmanagement

IfS – Institut für Sachverständigenwesen

VBLSA – Verband der Bausachverständigen Sachsen-Anhalt

have the honour of inviting you
to the 31st Baltic Valuation Conference.

The tradition of the conference is that the conference participants present cases and/or experiences from their profession, thus pointing out national solutions and problems of valuation. None of us would have expected the coronavirus pandemic lasting for such a long time, so again the organisation committee decided to avoid a face-to-face meeting and organise a virtual conference instead. So the pleasant side events like dinner, welcome reception or guided tour will have to be postponed for another year, but hopefully 2022 allows a face-to-face meeting again and will then lead all of you to Potsdam.

So in spite of the change in performance please register as a speaker and share your experiences. Your presentation can either be sent to the BVS on beforehand or you allow all participants to share your computer or upload your presentation. We will use Zoom for the virtual conference.

The Baltic Valuation Conference is a non-formal meeting of valuers of countries around the Baltic Sea. It does not only offer an informative exchange of experience and methods, but provides also personal contact to colleagues in other countries.

The conference is driven by individual effort and interest – help to keep it going!

31st Baltic Valuation Conference

Virtual Conference

on June 17th, 2021

Topics of the BVC 2021:

- One year with corona influenced markets: expected and unexpected developments.
- New influences on market prices and lending value: green buildings, sustainability, the role of carbon neutrality / decarbonisation of buildings, environmental risks etc. – what are the results of statistical evaluations?
- Forecasting of real estate data: how are real estate data made available in the participating countries?
- Job profile: expert for valuation of real estate – what are the challenges for the future?
